## Operations and Finance

# managing operations and finance for high-tech equipment companies

### WE EMPOWER YOU TO DO WHAT YOU DO BEST

AristaSoft provides integrated business process services based on deep, industry-focused domain expertise and a portfolio of relevant enterprise-class applications delivered on a secure, scalable and reliable ASP infrastructure.

AristaSoft's industry-focused solutions are specifically designed to give emerging, hyper-growth high-tech equipment companies access to the same integrated business processes and technology solutions used by business leaders worldwide — minimizing the time, labor, risk and investment associated with deploying, maintaining and supporting these solutions.

### HIGH-TECH EQUIPMENT

companies are streamlining their back-office operations and building the capabilities required to quickly adapt and respond to new market opportunities. They are continuously looking to improve their overall operations by reducing inventories, shortening cycle times, managing costs and leveraging trading partners to compete successfully. These companies are establishing the processes, systems and relationships that enable them to grow rapidly.

AristaSoft's Operations and Finance solution is designed for emerging, hyper-growth high-tech equipment companies integrating business information across the organization and their network of trading partners. OneWorld® from J.D. Edwards has been tailored to best suit the business processes required by the high-tech equipment industry.

### HIGHLIGHTS

- *Order management*
- *Inventory management*
- *Procurement*
- *Production planning*
- *General ledger*
- *Accounts payable*
- *Accounts receivable*
- *Integration with enterprise applications*

# manage your operations and finance processes and build a bigger business faster

## INTEGRATED TO MEET YOUR BUSINESS NEEDS

AristaSoft's Operations and Finance solution has been integrated with Collaborative Manufacturing Commerce, based on Agile AnyWhere,™ and Customer Service Management, based on Nortel Networks Clarify eFrontOffice,™ using webMethods Enterprise platform. This end-to-end solution enables the seamless flow of cross-application and cross-enterprise information and forms the basis for an integrated business infrastructure for the high-tech equipment industry.

**Operations Management** enables you to streamline your business flow from order booking through delivery. The solution is designed to meet the order management and production planning process requirements of high-tech equipment companies. It minimizes the manpower and time associated with each transaction in the order-to-cash process and manages the level of production output necessary to achieve planned levels of inventory and sales. The solution includes the following modules and capabilities:

- > Sales Order Management enables accurate and personalized order entry
- > Inventory Management provides instantaneous information regarding item availability at all inventory locations
- > Procurement facilitates control of the purchasing workflow specific to your suppliers and partners

**Finance Management** allows you to effectively track and manage your company's financial well-being. It helps you plan your future financial direction by enabling you to meet key business objectives of cost control, performance analysis and information management across the organization. The solution includes the following modules and capabilities:

- > General Ledger to enhance and streamline overall financial management
- > Accounts Payable to efficiently manage cash disbursements and related payable information
- > Accounts Receivable to manage the billing cycle by streamlining cash inflow processes
- > Fixed Assets to improve the accessibility and flow of your asset information
- > Cash Basis Accounting to automatically create the appropriate accrual and cash basis information

## servicing your integrated solution

Using our patented implementation methodology, which incorporates proven practices and templates designed for the high-tech equipment industry, our customers are operational with the relevant processes and technology solutions 3-5 times faster than traditionally possible. Our solution-centric training, during deployment and throughout the course of your relationship with AristaSoft, increases user acceptance and contributes to higher levels of productivity for your organization. Reliable, secure and around-the-clock application access, delivered through dedicated network connections, provides a technical environment you can trust to support your mission-critical data.

AristaSoft's focus on delivering and maintaining the process expertise, applications and technology you need allows you to focus on building your business faster.
